1. Applicant's response filed July 21, 2002 has been entered as paper number 11. In this response, applicant defines "wireless communications electronics" to be the "wireless" manner in which a magnetic field is used when a magnetic card 30 is read by a magnetic card reader 13. In light of this definition of "wireless communications electronics", the following rejection is made.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 19-42 are rejected under 35 U.S.C. 102(e) as being anticipated by Atchley 5,493,315. Atchley discloses a fuel pump system which includes a display means (col 4 lines 27+), an input means for users selections (col 4 lines 40+), memory means and processing unit (col 4 lines 60+) and a card reader which can read data from a magnetic stripe on a card (col 4 lines 3+).
